## INTRODUCTION

This report is the first annual report designed to satisfy the requirements of the Every Student Succeeds Act (ESSA) that was signed into law in 2015. School year 2017-2018 was the first year in which state and local educational agencies were required to implement the provisions of that law. This report addresses the following three areas.

- Demographic characteristics of students classified as English Language Learners (ELL).
- English language acquisition results of ELL students on the English Language Proficiency assessments known as ACCESS for ELLs.
- Academic achievement results of students in the English for Speakers of Other Languages (ESOL) program and those who exited the ESOL program on the Florida Standards Assessments (FSA), and End-of-Course (EOC) assessments.
Each of these three areas is described in a separate section of the report.
When a student enrolls in Miami-Dade County Public Schools (M-DCPS) for the first time, a Home Language Survey is completed by the student's parents/guardians. This survey inquires whether a student's first language was a language other than English, whether a student's primary language is a language other than English, and whether a language other than English is used at home. If at least one of the answers is Yes, the student is tested to determine his/her English proficiency. Based on the results of this assessment, the student is either classified as an English Language Learner (ELL) or deemed proficient in English. Depending on the English proficiency levels, ELL students are enrolled in specific ESOL courses tailored to meet students' language needs. English proficiency levels for ELL students in M-DCPS range from ESOL 1 (lowest) to ESOL 4 (highest). Students' English proficiency levels are reassessed annually, and the appropriate ESOL placement is determined based on the results of that testing. Currently, ACCESS for ELLs is used as the State-mandated English Language Proficiency test. ACCESS for ELLs stands for Assessing Comprehension and Communication in English State-to-State for English Language Learners. Once it is ascertained that a student has acquired English proficiency and satisfied the State requirements for exit from the ESOL program, the student exits the program and is re-classified as formerly ELL (ESOL level 5).

In this report, the achievement of students in the ESOL program is disaggregated by grade and ESOL level. As required by ESSA, the academic achievement results of formerly ELL students disaggregated by the number of years since ESOL exit are included in this report. For comparison purposes, the performance of students who have never been classified as ELL is included in the report as well. The time since ESOL exit is calculated as of May 1, 2019.

## SECTION I 2018-2019 STUDENT DEMOGRAPHIC CHARACTERISTICS

This section describes certain demographic characteristics of ELL students in the District as of February 2019. Table 1 below exhibits demographic features for all K-12 students in the District disaggregated by their ELL status, race/ethnicity, free/reduced price lunch (FRL) status, special education (SPED) status, and student language.

Table 1
2018-2019 Demographic Characteristics of Students in Grades K-12 by ELL Status

|  | Non-SPED | 56,101 | 88.1 | 210,209 | 73.4 |

Table 1 shows that ELL students, as a group, differ from the rest of the students in the District on some important characteristics. Overall, ELL students are more likely to be eligible for the federal free/reduced price lunch program (the eligibility for which is based on the household income) than students in the non-ELL group. In addition, ELL students are much less likely to be classified as gifted than are students in the rest of M-DCPS.

## SECTION II <br> ENGLISH LANGUAGE ACQUISITION RESULTS

ACCESS for ELLs was developed by the multistate World-class Instructional Design and Assessment (WIDA) consortium. It measures students' English language proficiency in four language domains: Listening, Speaking, Reading, and Writing. The assessment provides scale scores and proficiency levels in each of these domains as well as an overall composite scale score and proficiency level. Proficiency levels vary from 1 to 6 and are labeled (1) Entering, (2) Emerging, (3) Developing, (4) Expanding, (5) Bridging, and (6) Reaching. Level 6, or Reaching, is considered by the WIDA consortium as indicating proficiency in a particular English language domain. Proficiency level determinations are grade-level specific; proficiency levels below level 6 are reported as decimals. For example, a proficiency level of 3.4 indicates that a student is at the Developing level of proficiency and has made four tenths of the way to the Expanding level.

## Acquiring English Language Proficiency

Tables 2 and 3 show the percentages of ELL students scoring within proficiency levels 4-6 by language domain and on the composite scale by grade and year. These proficiency levels are selected because the Florida State Board of Education defines scoring "proficient" on ACCESS for ELLs as scoring at or above proficiency level 4 in reading and at or above level 4 on the composite scale.

Tables 2 and 3 show that the percentages of K-12 ELL students who scored within proficiency levels 4-6 in each of the language domains except Reading and on the composite scale were higher in 2019 than in 2018.

## Making Progress in English Language Acquisition

Table 4 exhibits percentages of non-ESE ELL students who made progress in each language domain and on the composite scale between 2018 and 2019. ESE students are those who have any primary exceptionality except gifted. Non-ESE students are those who are identified as gifted or have no primary exceptionality. Making progress in a language domain is defined in this report as having improved the domain proficiency level by at least 1 (for example, moving from a proficiency level 1.2 to 2.2 or higher in the language domain of Listening) or maintaining a proficiency level 4 or higher.

Table 5 shows the same information for ESE ELL students (those with any primary exceptionality except gifted).

Tables 4 and 5 show that the percentages of ELL students making progress between 2018 and 2019 varied by language domain with the smallest percentages making progress in writing and the largest percentages in listening. This was true for both ESE and non-ESE students.

## Acquiring English Language Proficiency and Exiting the ESOL Program

The Florida State Board of Education defines scoring "proficient" on ACCESS for ELLs as scoring at or above proficiency level 4 in reading and at or above level 4 on the composite scale on ACCESS for ELLs. Students in grades K-2 who score proficient on ACCESS for ELLs (as defined above) exit the ESOL program in accordance with the State Board Rule. Students in grades 3-9 must in addition score within achievement levels $3-5$ on the FSA ELA to exit the ESOL program. Students in grades $10-12$ must satisfy the ELA graduation requirement on the FSA ELA or via concordance scores.

Table 6 shows English language proficiency ESOL exit rates in 2017-2018 and in 2018-2019. The column labeled "Total n" refers to the number of ELLs as of June of each school year who participated in the ACCESS for ELLs. The figures shown in the next columns reflect those who scored proficient on ACCESS for ELLs and those who exited the ESOL program based on the State criteria.

| K-12 | 64132 | 15302 | 24 | 9196 | 14 | 61171 | 14467 | 24 | 8896 | 15 |

Table 6 shows that the K-12 English proficiency rate for ELL students was $24 \%$ in both 2017-2018 and 2018-2019. The ESOL exit rate was $14 \%$ in 2017-2018; it increased to $15 \%$ in 2018-2019.

ELL students who do not satisfy the State criteria for exit from the ESOL program remain in the program. The ACCESS for ELLs results are used in the District to assign the new ESOL level. Generally, the proficiency level on the composite scale is used for that purpose. If a student exhibits a composite proficiency level (truncated to the whole number) that is higher than the current ESOL level, then the student is "promoted" to that higher ESOL level, but not higher than ESOL level 4. For example, if the current ESOL level is 2, and the student scores a level of 3.1 on the composite scale, then the student is assigned a
new ESOL level of 3 . On the other hand, if the student demonstrates a composite proficiency level that, when truncated to the whole number, is not higher than the current ESOL level, the student's current ESOL level remains. For example, if the current ESOL level of a student is 2, and the student scores 2.9 or lower on the composite scale, the student's ESOL level remains 2.

Table 7 below shows the progress of students in terms of their movement to the higher ESOL levels and exiting the ESOL program for both the 2017-2018 and 2018-2019 school years. For example, it shows that in 2018-2019 of the 2449 ESOL 1 students in grade K, $83 \%$ remained in ESOL level 1, $9 \%$ advanced to ESOL level 2, 5\% - to ESOL level 3, 1\% - to ESOL level 4, and 2\% exited the ESOL program. The percentage of grade K ELL students who advanced at least one ESOL level or exited the ESOL program was 20\% in both 2017-2018 and 2018-2019.

## Long-Term ELLs

Table 8 shows the number and percentage of English language learners who have not satisfied the State criteria for exit from the ESOL program within 5 years of their initial placement into the program as of the end of each school year. ESE students are those who have any primary exceptionality except gifted. Non-ESE students are those who are identified as gifted or have no primary exceptionality.

Note: The counts of students who participate in Alternate ACCESS for ELLs and who might exit the ESOL program based on the results of that assessment are not included in this table.

Table 8 shows that the percentage of long-term ELL ESE students in grades 3-12 decreased from $51 \%$ to $30 \%$ between 2017-2018 and 2018-2019. During the same period, that rate for non-ESE students decreased from $14 \%$ to $10 \%$.

## SECTION III 2019 STATE ASSESSMENT RESULTS BY ELL STATUS

This section describes the academic achievement of students in the English for Speakers of Other Languages (ESOL) program on the 2019 State exams. In addition, it describes the performance of students who exited the ESOL program. The data are disaggregated by grade group, ESOL level or the time since the ESOL exit and students' ESE status. This section is separated into several subsections dealing with different academic disciplines.

## 2019 FSA English Language Arts (ELA) and Mathematics Results

## Non-ESE ELL Students

Overall, $28 \%$ of the current non-ESE ELL students in grades 3-5 performed at or above achievement level 3 on the ELA component of the 2019 FSA as compared to $29 \%$ in 2018. The corresponding percentage for the Mathematics component was $46 \%$ in both 2018 and 2019.

In grades 6-8, $13 \%$ of the current ELL students performed within achievement levels 3-5 on the 2019 ELA component of the FSA, which was a 2 percentage points improvement from the 2018 result. The 2019 percentage for the mathematics subtest of the FSA was $26 \%$ as compared to $27 \%$ in 2018.

In grades 9-10, about $8 \%$ of the current non-ESE ELL students performed within achievement levels 3-5 on the ELA component of the 2019 FSA, the same percentage as in 2018.

## ESE ELL Students

Overall, $17 \%$ of the current ESE ELL students in grades 3-5 performed at or above achievement level 3 on the ELA component of the 2019 FSA as compared to $18 \%$ in 2018. The corresponding percentage for the Mathematics component was $32 \%$ in 2019, which was 2 percentage points higher than in 2018.

In grades 6-8, $5 \%$ of the current ELL students performed within achievement levels 3-5 on the 2019 ELA component of the FSA, a 1-percentage points improvement from the 2018 result. The 2019 percentage for the mathematics subtest of the FSA was $11 \%$, which was 2 percentage points higher than in 2018

In grades 9-10, about 4\% of the current non-ESE ELL students performed within achievement levels 3-5 on the ELA component of the 2019 FSA; one percentage point higher than in 2018.

The results shown in Tables 9-10 indicate that the percentages of students in each grade group scoring at achievement level 3 or higher increase as students gain English proficiency moving from one ESOL level to the next. In addition, the results demonstrate that when the students acquire sufficient levels of English proficiency and exit the ESOL program, they are ready to demonstrate what they know and can do on academic achievement tests in English. The proportions of formerly ELL students scoring at or above achievement level 3 on the FSA ELA and Mathematics are substantially higher than those for the current ELL students. This is true for both ESE and nonESE students.

Overall, $17 \%$ of the current non-ESE ELL students in grade 5 performed at or above achievement level 3 on the 2019 FCAT 2.0 Science Assessment as compared to $20 \%$ in 2018. The corresponding percentage for grade 8 students was $11 \%$ in both 2018 and 2019.

Overall, $10 \%$ of the current ESE ELL students in grade 5 performed at or above achievement level 3 on the 2019 FCAT 2.0 Science Assessment as compared to $11 \%$ in 2018. The corresponding 2019 percentage for grade 8 students was $7 \%$, a 3 percentage points increase from the 2018 result.

The results exhibited in Table 11 reveal that the percentages of students at each grade level scoring 3 or higher increase as students gain English proficiency moving from one ESOL level to the next. In addition, the results demonstrate that students who exited the ESOL program exhibit markedly higher percentages scoring at or above achievement level 3 than the current ELL students do.
